

Subject: Action Required: Create Your Git Repository for TSX Unstop Python

Dear Students,

As we embark on the **TSX Unstop Python training**, it's crucial that we establish a robust version control system from the outset. Therefore, your immediate action is to create a Git repository for this project.

- Login to internlogin.techsonixsolutions.in
- Make sure your profile is updated.
- Note down your login ID, Password, etc.

1. Repository Name: **TSX Unstop Python**
2. Instructions
3. Create a Git Repository
4. Navigate to the directory on your local machine where you will be working

If you encounter any issues during this process, please don't hesitate to reach out for assistance.

Best Regards,

Training Head
